

CHSE Blueprint Review Course

ASPE Annual Conference
Orlando, FL

June 7, 2019

Gain the confidence and knowledge you need to become a Certified Healthcare Simulation Educator (CHSE) by attending the Society for Simulation in Healthcare's (SSH) new CHSE Blueprint Review Course. Led by well-known, experienced simulation experts, this one-day course provides essential information on pursuing certification.

Join us and.....

1. **Learn the components of the certification process.** This interactive course introduction will focus on exam prerequisites, the application process and the study resources available.
2. **Identify your exam content strengths and weaknesses.** The CHSE exam blueprint will be the basis for discussion.
3. **Develop your personal action plan.** Instructors will help you create a step-by-step action plan that includes a timeline, a list of study tools and resources, key dates and more.

Why earn the CHSE?

Earning the CHSE certification will help advance your career, position you as a leader and publicly demonstrate your commitment to being the best in simulation education. More than 800 educators in 12 countries have earned the CHSE credential since 2012. Add your name to this growing roster!

Did you know?

The CHSE exam, administered daily across North America and in other countries, includes 115 questions, of which 100 are counted toward a passing score.
